EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY

2022 – 2026

B.Tech in Computer Science

CGPA:8.93

- **Relevant Courses:** Data Structures & Algorithms, Object Oriented Programming, Software Engineering, Operating Systems, Cloud Computing, Generative AI, Prompt Engineering

TECHNICAL SKILLS

Languages: C++, Python, SQL, HTML/CSS, Java

Libraries & Frameworks: FastAPI, Spring Boot

AI & LLM: RAG, Vector DB, LangChain/LangGraph

Developer Tools: Git/Github, Docker, AWS, Jenkins

PROJECTS

AI SAAS COPILOT | *Python, FastAPI, React, ChromaDB, AWS*

🌐 Github

- Developed a document-centric AI platform allowing users to upload PDFs and interact through a chat interface, enabling contextual Q&A over user-uploaded documents.
- Handled 100+ document queries with sub-700ms average response latency using FastAPI backend services with session-based conversational memory.

RESU-PERFECT AI | *Python, FastAPI, React, ChromaDB, Supabase*

🌐 Live

- Engineered an AI-powered full-stack resume optimization platform serving 50+ users and processing 200+ resume analysis requests with ATS-based scoring and PDF generation.
- Designed RAG pipelines using ChromaDB for context-aware resume recommendations based on job descriptions.
- Integrated a React (Vite) frontend and FastAPI backend with responsive design, history tracking, and dynamic editing workflows.

MUMZVOICE AI | *Next.js, Gemini 2.5 Flash, Web Speech API*

🌐 Live

- Built a bilingual (English/Arabic) AI-powered product search prototype with RTL support, integrating Gemini 2.5 Flash for NLP and intent extraction.
- Implemented voice and text search using the Web Speech API with a graceful fallback to local logic ensuring 100% uptime reliability.

MINEOPOLY | *Python, FastAPI, WebSockets, Canvas, JavaScript*

🌐 Live

- Shipped a real-time multiplayer territory capture game support up to 4 concurrent players with spectator mode.
- Configured game logic including grid-based territory capture, randomized hidden mines mechanics across 3 configurable map sizes.

REAL TIME CHAT APPLICATION | *Java, Spring Boot, WebSockets, AWS*

🌐 Live

- Created a full-duplex, real-time chat system leveraging websockets for instantaneous bidirectional communication between clients.
- Employed a lightweight STOMP broker over websocket connection to manage user sessions, message routing, and topic-based broadcasting.
- Processed and deployed a production-ready build on AWS EC2, integrating S3 for .jar file storage and remote application live delivery through public IP.

EXPERIENCE

INDIA SPACE LAB

Dec 2025 – Mar 2026

Technical Intern

Delhi, India

- Developed a Python-based simulation script for trajectory analysis in drone navigation systems, improving data processing efficiency using the Haversine formula.

AWARDS & ACHIEVEMENTS

- Solved 450+ problems across platforms with 1519 rating on LeetCode consistently achieving high scores and improving skills in a competitive environment.
- Secured 3rd place at the CodeX hackathon organized by the Cisco during the annual techno-cultural fest AdVITy'a'24.
- Claimed 1st Position in a quiz competition during National Mathematics Week 2023 on behalf of the School of Advanced Sciences and Languages
